

SUSTAINABILITY

Since our inception in 2014 Santis Global has understood the importance of corporate responsibility and the environmental impact of our business.

We have therefore committed to not only promote sustainable solutions throughout our own supply chain, but to also encourage change for our partners and clients to help them do the same.

Through committed and rigorous self evaluation we have analysed how we can improve our processes to put less strain on our planet. Our aim is to set an example for the rest of the industry as drivers for actionable change towards a more sustainable future.

PUSHBIKE

ZERO EMISSIONS

MAXIMUM LOAD UP TO 1KG

FITS ENVELOPES OR SMALL JIFFY BAG

EACH BIKE SAVES 2.5 TONNES OF GHG EMISSIONS PER YEAR

MOTORBIKE

SUITABLE FOR LONG DISTANCE JOURNEYS OUTSIDE OF LONDON

MAXIMUM LOAD UP TO 8KG

HOLDS 1 A4 BOX

HOLDS STANDARD LAPTOP CASE

CARGO BIKE

ZERO EMISSIONS

MAXIMUM LOAD UP TO 100KG

HOLDS UP TO 2 ARCHIVE BOXES

50% FASTER THAN THE VAN FLEET

ELECTRIC VAN

ZERO EMISSIONS

MAXIMUM LOAD UP TO 740KG

HOLDS UP TO 2 EURO PALLETS

AVAILABLE FOR DEDICATED RUNS

SAVES A FURTHER 3-4 TONNES OF EMISSIONS A MONTH.

ELECTRICALLY ASSISTED PEDAL VANS

ZERO EMISSIONS

MAXIMUM LOAD UP TO 150 KG

50% FASTER THAN VAN FLEET

15 STANDARD ARCHIVE BOXES

CAN REPLACE SMALL VAN, SAVING OVER 2 TONNES OF EMISSIONS A MONTH.

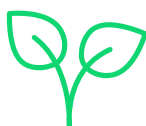

Our focus is not just on our fleet, we are also constantly reviewing improvements we can make around the office, including but not limited to:

1. GREEN COMMUTING

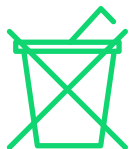

Research by the Carbon Trust suggests that allowing people to work from home in the UK could save more than 3 million tonnes of carbon a year.

We are therefore championing alternative working arrangements including working from home. For those who travel to work we encourage green commuting, such as walking or riding a bike. In order to support this, as part of our employee benefit plan we offer our employees the Bike 2 Work scheme.

2. BRING A DESK PLANT INITIATIVE

Having plants in the office reduces CO2 levels by around 10% - 25% whilst also enhancing happiness and productivity. This is why we encourage our employees to bring in plants of their choice and have them on their desks. It's fantastic to see everyone's greenery throughout the office and the joy as their plants begin to grow.

3. REMOVING UNNECESSARY PLASTIC USE

In recent years we have all become acutely aware of how hazardous plastic is to the environment. When burnt the chemicals emitted into the environment give rise to global warming not only harming the planet but also affecting global health. To combat this we have removed all the plastic from our office and replaced it with biodegradable alternatives. We've also provided all of our staff with reusable water bottles in order to reduce the waste of plastic bottles.

4. BEING SMART WITH PAPER

Paper impacts the environment both before and after use.

It is the third largest industrial polluter to air, water, and land and is the fifth largest consumer of energy. The production of pulp and paper also uses more water than any other industry. Here at Santis we have implemented comprehensive changes to the way we work in order to reduce our paper use including: paperless accounts, online payslips and the use of DocuSign.

5. RECYCLING

It cannot be overstated how important recycling is for the environment. By reusing raw materials and reducing the creation of new paper, plastic and glass it can save trees, forests and reduce the pollution of our seas and waterways. To maximise our recycling we have introduced separate bins for plastic, glass and paper and removed individual bins around the office.

6. CREATION OF OUR GREEN TEAM

We have established specific team members within our business whose role is to constantly search for new ideas to make our business more sustainable, and to ensure that we are staying committed to our vision for a green future.
